SELFIE MOSAIC

It creates a Mosaic with photos of the event in real time. Unique, original and very addictive. Ideal for entertaining and getting your guests involved in the event, leaving them an exclusive memory.

HOW DOES IT WORKS?

Selfie Mosaic is the exclusive service which allows us to create digital or physical mosaics, using the photos of your event. All live and in real time. Photos are automatically retrieved from all our models or they can be downloaded from Instagram. A photographer's camera can also be used on the place of the event. Selfie Mosaic will make your guests feel part of your event because the final image of the mosaic will consist of all the photos of the guests.

Extremely addictive, ideal for entertaining and astonishment. Thanks to our special printer, every single photo becomes a sticker each guest can place inside the Selfie Mosaic, thus creating the chosen image.

In a "physical configuration": photos are automatically printed as stickers. Guests can immerse themselves in the interactive experience by placing their photo stickers on the Selfie Mosaic, placed on a self-supporting structure.

In a "digital configuration": the Selfie Mosaic, in this case, is projected (using a projector, a large screen or a TV) and the photos are inserted by our software in the designated place as soon as they are taken, thus creating a 3D effect mosaic in real time.

The final result? An impressive mosaic made up of all the photos of the participants of the event!

THE SERVICE

- It can have a physical or a digital configuration
- Different sizes available (min. 50x70cm)
- Self-supporting structure
- Unlimited adhesive labels
- Compatible with all our other models
- It can be done both during and after the event
